

DockDeck

by **trusscore**

Lightweight,
low-maintenance
PVC dock system

DockDeck by Trusscore®, formerly known as Brock Dock, is the ultimate lightweight and long-lasting dock solution — without the hassles that accompany other dock products.

When you build your dock with DockDeck, you'll not only enjoy the look and feel but also reap the rewards of a high-performing product for decades to come.

Available in a width of 6 inches, DockDeck installation is quick and easy with the unique Clip Strip fastening system that keeps screws hidden and ensures that planks are spaced uniformly — while managing and controlling the natural expansion and contraction that occurs under temperature extremes.

Applications

DockDeck is the ideal solution for light-duty, removable docks and can be built prefab or custom.

- Pole
- Tower
- Floating
- Rolling
- Sectional

Benefits

Stays Cool

DockDeck offers exceptionally low heat retention and stays cool to the touch. The unique open cavity profile of DockDeck by Trusscore retains less heat than solid core products. This means your dock will stay cool in the heat so you can safely enjoy your dock without having to worry about dangerously hot boards.

Low Maintenance

No need to paint, stain, or seal—with DockDeck, you'll enjoy the ease of carefree maintenance. Weather resistant, 100% vinyl with UV protection ensures that your dock's beauty will endure the elements for years to come.

Where other docks become faded, discolored, or even rotted over time, DockDeck systems maintain beauty year after year.

Beautiful Aesthetics

DockDeck systems offer great-looking designs to enhance your outdoor space, combined with practical features to keep your dock safe and looking beautiful.

Two slip-resistant patterns ensure added safety when your dock is wet. Plus, with a variety of colors to choose from, you're sure to find a DockDeck system to achieve a look you'll love.

Ultimate Strength & Durability

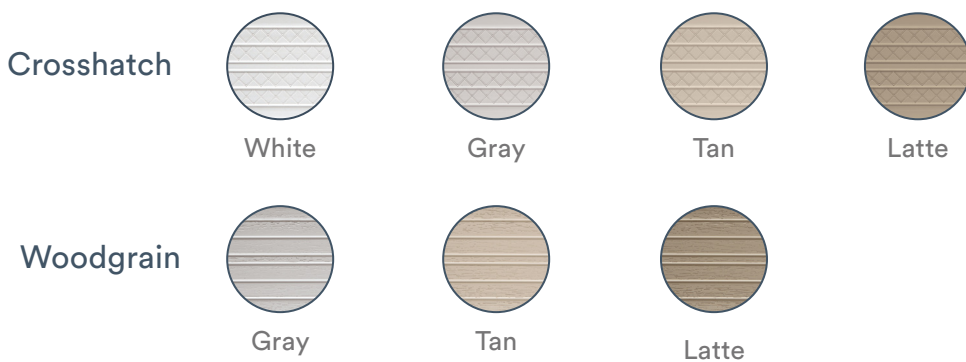

Made from 100% PVC, DockDeck by Trusscore is built to last. DockDeck systems undergo rigorous testing to ensure structural integrity and quality you can count on.

Products are assessed for weathering and structural performance as well as building code compliance.

DockDeck Features

- Lightweight dock material - 40% less than composite
