

Build 100% Water-Resistant Car & Truck Washes with

trusscore®

Car washes are demanding environments. Constant moisture, high-pressure sprays, and harsh chemicals quickly wear down traditional materials like FRP, tile, and painted surfaces—leading to costly repairs and downtime.

Trusscore panels are made from PVC and engineered for wet, high-traffic spaces. They're 100% water-resistant, impact resistant, and quick to install, keeping your wash bays looking clean and professional for years to come.

Applications

Trusscore PVC panels are the preferred choice across all types of wash facilities, including:

- ✓ Self-service wash bays
- ✓ Conveyorized tunnel automatic carwashes
- ✓ In-bay touchless automatic carwashes
- ✓ Commercial truck wash bays

WHY CHOOSE TRUSSCORE?

Moisture & Water-Resistant

Made from PVC, Trusscore panels are completely water-resistant and non-porous. They won't rot, warp, or deteriorate, and they create a protective barrier against moisture and chemicals.

Easy to Clean

Dirt, salt, and grime from vehicles wash away quickly, and the smooth surface makes cleanup fast and simple. Panels stand up to constant soap, suds, and detergents, and can be pressure washed without damage.

Easy to Install

The interlocking tongue-and-groove design means panels install up to four times faster than tile or FRP—no grout, glue, or curing time required. Less downtime means your wash is back in service faster.

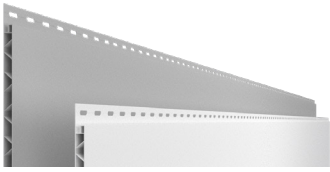

Industry-Leading Durability

Trusscore panels resist dents, rust, and corrosion—even after years of daily pressure washing and chemical exposure. Panels stay looking new, wash after wash.

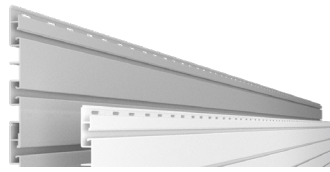

Trusscore® Products for Car & Truck Wash Facilities

Trusscore® Wall&CeilingBoard™

Interlocking PVC panels for interior walls and ceilings

- Available in 8, 10, 12, 14, 16, and 20 ft. lengths
- 16 in. wide panels match typical framing spacing
- Industry-leading 1/2 in. thick panels have a unique internal truss design for high-strength and rigidity
- Pre-punched screw flange and tongue and groove for easy installation
- “Class A” fire rating (ASTM E84/ULC S102)

Trusscore® SlatWall™

PVC slatwall panels designed to organize any space

- Available in 8 ft. lengths
- Supports up to 75 lbs per square foot
- Integrates with Trusscore Wall&CeilingBoard
- Non-proprietary design means panels are compatible with most slatwall accessories on the market

NorLock™ by Trusscore®

Freestanding PVC divider planks for non-load bearing partition walls and wash bay separation

- Available in multiple widths and lengths
- Interlocking panels have a tight-fitting tongue and-groove with no external support necessary
- Planks can withstand the extra weight of equipment, shelving, and other items fastened directly to them
