

Elevate Your Custom Homes with **trusscore**®

As a custom home builder, the materials you outfit a home with are more than just a reflection of your customer's preferences — they're also a reflection of your business. **To show that you value quality and integrity through the materials you build with, it's important to offer premium alternatives to traditional materials like drywall and medium density fibreboard.**

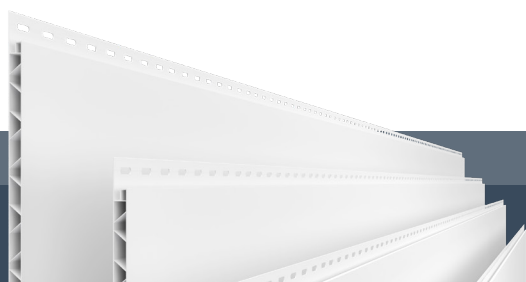

Trusscore Wall&CeilingBoard and Trusscore SlatWall can help. Made from PVC, our pre-finished panels make a statement by creating a bright, clean, and luxurious finish in high-end homes, interior spaces, and garages.

They also offer higher profit margins than other materials on the market: Panels install with no special tools or skills required, letting you save on time and spend less on labor.

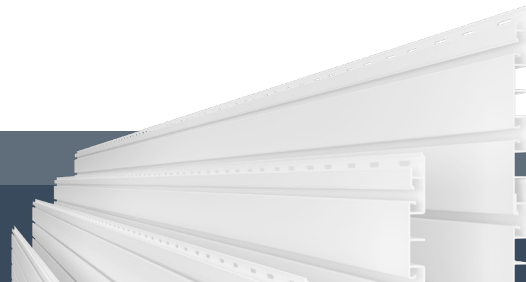

Plus, their high-strength, moisture-resistant, and easy-to-clean properties ensure the panels will continue to look their very best long after you hand over the keys. It's a win-win for you and your clients.

Where can you install Trusscore? *Nearly everywhere.*

Hosts, Designer, and Pro Contractor

Trusscore Wall&CeilingBoard™

Interlocking PVC panels for interior walls and ceiling

Available in 8, 10, 12, 14, 16, and 20ft lengths

Lightweight and low maintenance interior wall and ceiling panels that install with ease and provide a bright, clean finish in any space all while being waterproof and impact resistant.

Trusscore SlatWall™

PVC slatwall panels designed to organize any space

Available in 8ft lengths

A high-strength, on-the-wall storage system that can be installed as a track, section, half wall, or full wall to meet any customer's organizational needs.

Why Choose Trusscore?

Expand Your Wall and Ceiling Portfolio with a Premium Product

When helping a customer build their dream home, it doesn't make sense to select low quality products that won't stand the test of time. That's why Trusscore products are built to outlive the buildings they're installed in.

Thanks to the presence of PVC, Trusscore panels are scratch, dent, and damage resistant, will never grow mold or mildew, and will never yellow or fade.

Create Upsell Opportunities by Fully Outfitting Garages in Trusscore

Garages have historically been an afterthought for homeowners, but that's changing: Garage organization and storage is one of the fastest-growing home improvement categories, and the market size is expected to reach US\$36 billion by 2028.

A two-car garage needs approximately 1,000 square feet of Trusscore, which can create \$3,000 to \$5,000 in product sales and a huge upsell opportunity over drywall and MDF for your business.

Cut Days Off a Project Timeline with a Quick and Seamless Install

Pre-finished Trusscore Wall&CeilingBoard panels weigh 40% less than drywall and install four times faster with no mudding, taping, priming, or painting required. Equipped with a power drill and screws, anyone can install it — there's no need to hire specialized drywall contractors.

Plus, Trusscore SlatWall is the only product of its kind on the market that seamlessly integrates with a wall board, making it easier than ever to fully finish a wall.

Earn a Higher ROI Through Lower Install and Maintenance Costs

Trusscore panels are designed to help you and your future homeowner save on installation materials, labor, and maintenance costs. Compared to drywall, this translates to a higher margin for you and a 55% savings* in the total cost of product ownership for your customer.

**When compared to the cost to install and maintain painted drywall over 20 years.*

Get Product to the Job Site Quickly

Trusscore works with a network of distributors and retailers across North America that can have material on site within 48 hours. That means lower lead times, order volumes, and delivery costs for you.

**Make Trusscore part of your product portfolio
for your custom homes today.**
